Logan Soil & Water Conservation District
 2019 Tree Sale

Logan SWCD is offering an assortment of tree packets and mixes for sale to urban and rural landowners. The plant varieties are selected for their popularity and hardiness in the Logan County area and seed mixes to attract pollinators as well make your vegetable gardens healthier. Trees provide food and cover for wildlife. The following trees and shrubs are great for animals and birds through winter, spring, summer and fall. Our seedlings are 1-2 years old and are packaged in groups of ten.

This is an economical way to work toward establishing or adding to a wildlife area, to create a wind-break, or landscape.

American Arborvitae
 (White Cedar)
 A dense, flat green pyramidal tree. It has feather-like yellowish-green needles with blunt tips. Has a medium growth rate & grows 40-60-ft. high, useful as a windbreak & wildlife habitat.

American Sycamore
 One of the biggest, sturdiest & most durable of North America hardwoods. It's the most striking feature is its unique bark, resembling the camouflage of a soldier's uniform. Height: 80-100 ft. Does well in most soils.

Bur Oak
 A massive, majestic Oak and native to Ohio. May reach 90 ft. tall and 80 ft. wide. Large, leathery leaves. Deer enjoy the acorns the Bur Oak produces.

Black Walnut
 One of the most valuable native trees. Heavy, strong, durable heartwood, in great demand for veneers, cabinet making. Nuts are eaten by humans & wildlife 70-100 ft.

Colorado Blue Spruce

Needles are stout and prickly. 3/4-1-1/4 inches long, rich green to bluish green. Moderate growth rate.

Flowering White Dogwood

Produces creamy white blossoms in spring and red berries in autumn & winter that are enjoyed by wildlife. Ht: 10-20 ft.

Hazelnut (American)

A shrub with broad heart shaped 2-5 leaves. Leaves turn orange & purple in the fall. Has male & female flowers. Wildlife & humans enjoy the edible nuts. Ht: 10'.

Norway Spruce

Needles are dark green, 1/2-1 inch long. The twigs and branchlets hang downward. The only spruce with drooping branchlets and the only one with large cones. Ht: 60-90 ft. Useful for wildlife habitat.

Pin Oak

A fast growing, large maturing shade tree which has an oval-pyramidal shape. Leaves are glossy green in summer. Fall color ranges from red to brown. Utilized by many game species. Pin oak is commonly planted for food plots.

Red Oak

Leaves turn vibrant red in autumn. Fast growth, up to 2' per year. Prefers sandy loam acidic soils in full sun. Wildlife enjoy the acorns that are produced. Ht: 65-100 ft. Good for timber.

Shagbark Hickory

A slow growing but potentially massive tree that prefers deep, moist, rich well-drained soils and sunny areas. Virtually disease and pest free; fruits, etc. Great for wildlife. Suited more for a woodland area rather than a yard.

Silky Dogwood

A shrub native to Ohio. Prefers moist, wet sites but adapts to dry soils in summer & fall. Twigs in winter are a reddish-purple. Wildlife enjoy the berries it produces. 10ft. y 10ft.

Sugar Maple

A native tree that has dark green foliage turning yellow to orange to fiery red in fall. Grows in most types of soils. The sap is used to make maple syrup. Slow to medium growth. Ht: 40-60 ft.

Swamp White Oak

Happiest when it is getting it's feet wet, but surprisingly drought tolerant. Provides housing and food for birds and mammals. Ht: 50 ft.

Sweet Gum

Star shaped leaves turning to brilliant reds, oranges, yellows & purples in autumn. Sweet Gum are extremely resistant to pests & diseases. Birds enjoy the seed capsules. Ht: 60-90 ft.

Tulip Poplar

One of the tallest hardwoods. Long straight trunk, narrow crown & beautiful flowers resemble tulips. Leaves turn yellow in fall. Lumber is used to build toys, furniture, instruments. Ht: 80-100 ft.

White Oak

A tall tree with rather evenly lobed hairless leaf that may be somewhat whitened underneath. Growth is good, best on deep, well drained loamy soils. Can be used in a windbreak. Good for timber. Ht: 60-80 ft.

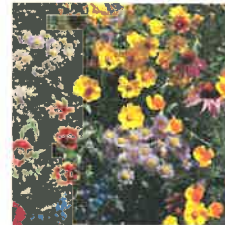

White Pine

Needles are in 5's, 3-5 inches long, soft texture, rich green. Fast growth rate. Good as a windbreak. Height up to 100 feet.

Winterberry

An erect moderate sized shrub, growing to heights of 5 to 15 feet tall. The smooth bark is gray to blackish. Leaves that are 1 1/2-4 inches long that are dark green in summer turning to yellow in fall and dropping off by mid October. After 3 years scarlet red to orange globular fruit mature by late summer, often remaining into mid winter.

Bee Feed Wildflower Mix

A blend of annual and perennial flowers that provide nectar & pollen to wild bees, honey bees & other pollinators. Blooms early summer to fall. 4 oz. poly bag seeds approx. 1,350 square feet.

Bird & Butterfly Wildflower Mix

The flowers in this blend attract Hummingbirds and butterflies all summer long. The heavy reseeding annuals act as a natural food source for songbirds. 4 oz. poly bag seeds 1,350 square feet.

Tree Protectors

Translucent tubes provide a protected, growth-friendly environment for seedlings. Offers protection against wind, animals, birds and sprays.
